Kills caterpillars, aphids and thrips. Breaks down quickly. Low toxic. It controls caterpillars, aphids and thrips on vegetables, vines, flowers and ornamentals.

Note:

1. Other registered botanical based active constituent products that control thrips and sucking insects may exist.
2. Like other thrips pests, mites, aphids and psyllid pests (e.g. TPP*), finding the right combination of control options and timing may take time. Seasonal weather variations can also influence the abundance of pests. Document your methods and products used, as well as your timing, so you can repeat successful treatment regimes, or adjust as you need.
